Teaching sustainability in *Aquatic Science and Technology* - collaborations between DTU-Aqua, UCPH-BIO and UCPH-PLEN

Marianne Ellegaard, me@plen.ku.dk, Department of Plant and Environmental Sciences, University of Copenhagen

Marja Korksi, DTU-Aqua, Head of studies

Mathias Middelboe, Marine Biological Section, University of Copenhagen

Sustainable use of marine resources and unlocking the biotechnological potential of the sea are two topics of current intense interest and relevance. In the courses Applied Marine Biology and Applied phycology we collaborate in teaching and supervising students from DTU, UCPH and other Universities in marine ecology, sustainable management of marine systems and Blue Biotechnology. We will present specific topics of this teaching program and our experiences with inter-university collaboration on teaching and education.
